

our brand fonts

primary font

Houschka Rounded

A delightful & fun font used as the primary font for brand communications, with two approved weights:

Bold is used primarily for headlines and subheads. Using all lowercase adds an informal tone to the context, but initial caps should be used for proper nouns.

Medium is used for body copy and when needed to contrast the bold in headlines for highlight and emphasis.

Note: Please use Helvetica if Houschka rounded is not available.

secondary font

DK Moonlight Serenade

We have a secondary approved font, DK Moonlight Serenade, which is a great accent to the primary font. It has a hand-drawn look and cheerful look great for accents, call-outs, and can even be used as a headline. Just be sure to use the capitalized version only!

our brand colors

primary colors

bold, fun and bright

The main brand colors are teal and green. These are the colors in our brand logo and with a new allergy friendly positioning, we will be leading with teal. Green is next in priority as it communicates organic. There are two other primary colors, magenta and purple.

secondary colors

These are the colors associated with the different product categories.

All colors can be used as type color, accent color and/or background colors.
